

Turus

Timeless pendant rings beautifully built in Germany.

LED

A bi-directional imaginative luminaire utilising the full flexibility of LED technology. The inner ring of light provides an element of intensity while the outer ring spreads a uniform amount of ambient light. The extruded aluminium body acts as a thermal control to the LED's keeping the temperature constant and the output to an optimum. Multiple permutations available and custom colours upon request.

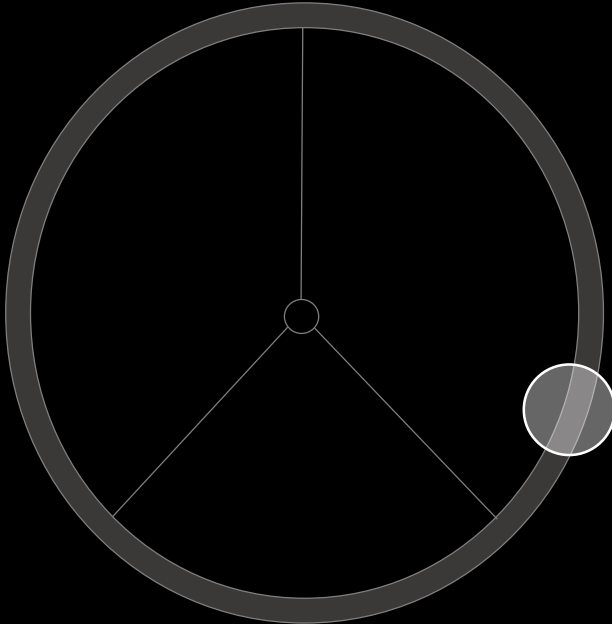

The Turus fitting is delivered to site complete so no assembly works are required by the contractor. In addition the drop suspension wires cleverly integrate the power cabling so there is no snaking cable dropping from the ceiling, further enhancing the clean lines.

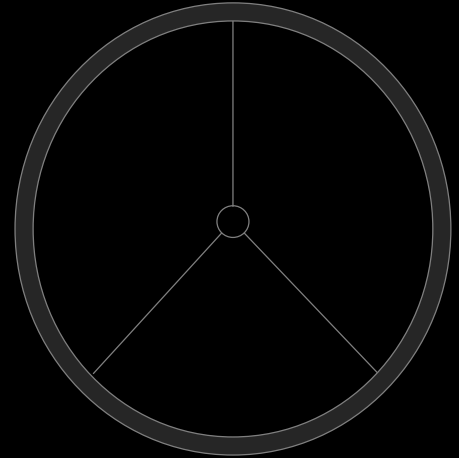

Spectral Turus

Diameter Options:

1900mm Diameter

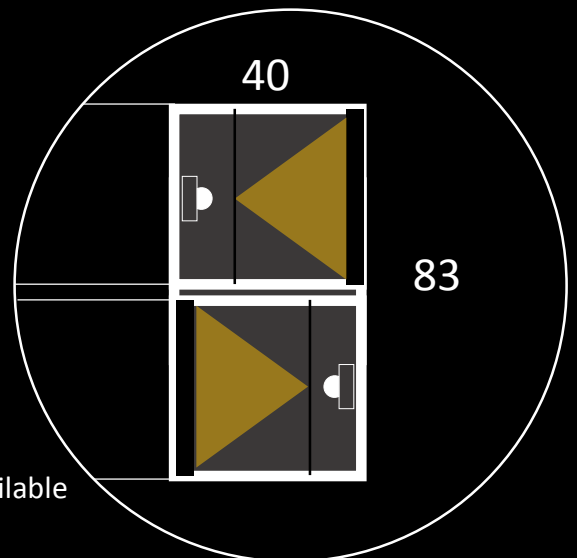

1400mm Diameter

TURUS Product Specification data

Power:	9.6watts per metre
Cri:	85+
Lumens:	800Lm per metre
Lumens per watt	81
IP rating:	IP20
Diffuser :	Opal PMMA
Body :	Aluminium extrusion
Finish :	Any RAL
Control :	Dali Dimmable version available
Power supply :	24 volt mounted in rose

Turus

Realise your imagination.

Spectral can realise chandelier applications of the Turus pendant. We use CGI technology to present your designs in 3D.
